

EuroXciser Derby Comparison Sheet

Our heritage was founded by building our first EuroXciser for our farm. This quickly led to building this same machine for friends, and word-of-mouth expanded our base of business, where owners recognized the advantages of training with a EuroXciser.

We understand the duty cycle expected of these machines on commercial farms and how important the EuroXciser becomes in the daily training plans. We have installed over 500 machines, use only the finest quality mechanics and state of the art motor drive technologies, to offer you one of the lowest cost of ownership products in the market.

We back our commitment to quality with our 10 year warranty on the frame and 10 years on the motor/gear/table bearing drive train. We employ only certified structure steel rated welders for our product, and protect our structural steel with hot dip galvanizing, the same process municipalities use to protect structural steel for public works infrastructure.

Derby Model	Structural Steel Hot Dip Galvanized	Motor Horse Power			Controller		Partitions		Fencing			Track Cover	Full Cover
